GENERAL SYSTEMS ANALYSIS OF COMMUNICATION WITH THE GODHEAD

Fred Bernard Wood, Ph.D.(elec. engin.)

Abstract

A general systems analysis of "COMMUNICATION WITH THE GOD HEAD" is initiated. Many different religious traditions have leaders who claim to have talked to or heard messages from God. At this stage I wonder if there is a possible electrical circuit analogy or is there a possible computer software simulation, or is there a real electromagnetic wave or magneto-hydrodynamic wave storage and transmission of ideas of past leaders?

During the past 10,000 years gurus have developed, particularly in India, who learn to tap into some etheric messages. The etheric memory usually consists of the optimum concepts for human behavior developed at some time in the past by Jesus Christ or other leaders or directly from God.

Gurus in FSR* have techniques to train the next generation of Devotees to tap into these stored messages, so that in the event of great catastrophes on Earth, people can survive in isolated mountain top caves or other refuges, so they can bring the lost knowledge to the next human civilization. It is important that a chosen few survive to carry out this mission. Even if none of the Devotees survive, the surviving human beings can through centuries of meditation and studying recover the ability to read etheric messages.

*FSR = Fellowship of Self Realization

Barbara Marx Hubbard has a different Mission than FSR, she is communicating with God in the area of the Book of Revelation of the Bible for the purpose of developing an evolutionary movement toward the next step in human civilization. Barbara Marx does not appear to have assimilated the cycles of civilization in Sri Yuktswar, Holy Science. She needs to add a geophysical consciousness to accomplish her goals.

I conclude that there is a physical-chemical medium that stores wisdom of past great leaders of human civilization that can be read and decoded by great masters of the human species. The storage and decoding process permits the continuance of human civilization even after a great flood, nuclear winter, collision with an asteroid, etc., occur. For lesser catastrophes such as the 23-rd ice-age cycle of an ICE EPOCH such as the 6-th ICE EPOCH that we are now in can save pockets of human civilization in the great river deltas.

The Devotees of GPF learn through special meditation practice and guidance from their gurus how to utilize the extended capabilities of their brains and nervous systems.

I initially assume that the brain memory language is digital (0,1) or fuzzy (0,z,1) and think that the next level of coding is Ahasic and in addition the brain has translators to other languages. For example MOSES or Mr Sinai was directly connected to the accumulated ethical concepts that were stored in the "Godhead" memory. This memory is presently assumed to be in the TESLA FIELD OR VACUUM FIELD.

THIS FIELD IS PROBABLY MODULATED WITH A BINARY CODE THAT IS THEN PROCESSED THROUGH a shift register using a Galois Field polynomial generator.

Master philosophers go through a transmutation whereby their thoughts are saved a time(cyn) with a high order polynomial for error protection and security protection so only those with the correct DNA code can decode the messages. To comprehend the total picture, one must temporarily disconnect the part of the brain reserved for sex behavior and use that segment for storing remainders of the Galois field division process
.....

The Tesla Field needs to be investigated more thoroughly. Dr. Willem Reich was sentenced to federal prison on charges brought up by the FDA about his pyramid device that tapped the Tesla Field, Tachyon Field, Orgone Field, or Vacuum Field.

The FDA charges against Reich were based on (FALSE or TRUE) or (0 or 1), Aristotelian Logic, while (FALSE,DONT KNOW,TRUE) OR (0,fuzzy,1) type of logic would give us more information about the system and Reich's claims.

These concepts suggest that there is a delay line type memory structure in the brain for decoding message from the past.

These concepts imply that "reincarnation" only applies to a section of ones genetic code, so that several people of the past would have the same shortened DNA code. The people having the same short-code as I do would constitute my past lives. This short-code section of the DNA would be the Galois field polynomial or its generator.

[1031-0]

We have a possible convergence of electrical communication theory and religious communication coming up on the horizon.

We need to formulate analysis of plausible electromagnetic wave modes that could be part of the Tesla Field. Then we need to formulate a hypothetical molecular structure for transducers in the brain.
